The roadmap for European CAM research

CAMbrella is a European research network for complementary and alternative medicine (CAM). The group consists of 16 partner institutions from 12 European countries and is focussed on academic research into, but not the advocacy for any CAM treatment. The group has been established under the Seventh Framework Programme.

Between January 2010 and December 2012 the CAMbrella consortium has been looking into the current status of CAM in Europe from different angles:

This website provides the results of CAMbrella. Many of them are already there – just browse through the archive and the documents section. Between December 2012 and April 2013 we still will upload reports and documents generated in the workpackages of CAMbrella.

You can register here to be alerted of new uploads.

DAYS

Before Horizon
2020 launch

HORIZON 2020
THE FRAMEWORK PROGRAMME FOR RESEARCH AND INNOVATION

Horizon 2020/CAM research

New wording after voting in the ITRE committee, Nov 28, 2012 (personal communication, without liability)

2011/0402 (CNS) - Proposal for a COUNCIL DECISION establishing the Specific Programme Implementing Horizon 2020 - Part III Societal Challenges

1. HEALTH, DEMOGRAPHIC CHANGE AND WELLBEING

“An increasing disease, *particularly chronic disease*, and disability burden in the context of an aging population places further demands on health and care sectors, *but also in social innovation research and development*. If effective health and care is to be maintained for all ages, efforts are required to *improve and speed-up* decision making *and awareness-raising* in *disease prevention and treatment provision, rehabilitation and retraining* to identify and support the dissemination of **best practice in the healthcare sector**, and to **support integrated care, including interventions of complementary and alternative medicine ...**, *in full respect for their health care choices*. Doing so will contribute to increasing, and lengthening the duration of their physical, social, economic and mental well-being. *Special attention should be devoted to chronic diseases, such as cancer, cardiovascular, rheumatic and musculoskeletal, diabetes, respiratory and mental diseases*”.

CAMbrella/CAM research

The future!

**Good bye and see you soon
at the Kick-off Meeting of the next CAM
research project**
